

Plug Guard

Prevent Extension Cord Disconnect

The **Plug Guard** prevents the disconnection of two electrical cords. It comes in two sections, a male and a female, each self-hinged, clamshell style with interlocking rings. The **Plug Guard** is lightweight, easy to operate, and strong. It can be used in any setting to prevent the disconnection of cables or to protect the connection from the elements.

After the cords are connected, the male half is snapped shut around them and the female half is closed around the balance of the cords interlocking with the rings of the male. The latches are pushed again, securing the second latch, and the halves may be counter-rotated to further prevent accidental opening.

FEATURES

- **Pulls Around Corners**
Curved ends won't catch corners when dragged.
- **Will Not Snag**
Smooth, cylindrical shape resists catching objects.
- **Adjustable Length**
Fits assembled plugs from 3-3/16" to 4-7/16" long.
Accommodates cords up to 3/8" diameter.
- **Strong and Rigid**
Its cylindrical shape is naturally strong.
Made of long-life polypropylene.
- **Lifetime Replacement Guarantee**
Broken or defective product replaced at no charge.

APPLICATIONS

- **Home & Garden**
Keep connections for trimmers, weed whackers, pumps, lighting, etc. secured.
Prevent cord connection access to children & pets.
- **Workshop & On-the-Job**
Maintain connectivity with saws, drills, sanders, buffers, lights, etc.
- **Computer Room**
Keep computers, printers, & modems from failure due to disconnections.
- **Health Care Industry**
Secure connections to key medical and support equipment.

BENEFITS

- **Prevents electrical connection failure between two devices.**
It is virtually impossible to accidentally open the unit.
- **One set can be used on any number of cables.**
It does not require cutting the cable ends off for installation.
It is not permanently attached to the cables that it protects.
- **The connection is protected from damage and the elements.**
It remains closed even when accidentally stepped on.
It is resistant to chemicals, most organic solvents, and the elements.

DIMENSIONS *(Approximate – awaiting final figures)*

Exterior –	2" diameter, 4.25" long		
Interior –	1-7/16" at narrowest (center) point		
Weight –	1 – Unpackaged	=	1.6 oz.
	1 – Blister Carded	=	2.6 oz.
	24-pk – Inner Box	=	4.5 lbs.
	144-pk – Master Carton	=	28.7 lbs.
